Fall '22	Data Structures	(A)
Spring '23	Analysis of Programming Languages	(A)
Spring '23	Software Engineering	(A)

PROJECTS

Digital Portfolio Link to Website

Personal portfolio created using HTML, CSS, and JavaScript. This project is currently running on the same linux-based servers I work to maintain.

Pathways - 2D Slide Deck Link to Code

Web-based application for creating a series of two-dimensional pathways within a collection of images. This project is meant to serve as a template for the creation of artist portfolios. Created using the Django framework with HTML, CSS, JavaScript, and Python.

Composite Sound Wave Visualizer - 1st Place (MLH Hackathon) Link to Demo

Application for visualizing multi-layered sound waves through the principles of super position and amplitude modulation. Built in Python using the matplot, numpy, and tkinter libraries.

CUcourses - Course Review Platform Link to Code

Web-based application for posting and searching through course reviews. Built by a team of three, intended for use by Clark University students and faculty. Created using the Django framework with HTML, CSS, JavaScript, and Python.

WORK EXPERIENCE

HCI Research Assistant - Clark University CS Department July '23 - September '23

- Interviewed local organizations involved in disability outreach
